

Getting Started

1. Features

- USB 2.0 interface, transmission rate up to 480Mbit/s, 48 times faster than USB 1.1 interface.
- Fluency video display, 720×576 image up to 30 frames/s
- Moving image display up to 1440×1152
- Sharp and nature image with true color
- Auto brightness, white balance, color saturation, contrast, Gamma and so on advanced digital video control function
- Built-in sensitive microphone for voice communication through Internet
- Illuminating LED's auto turn on in dark

2. Specification

Image sensor 1/4" COMS

Image element 720H x 576V element

Display size 176×144, 320×240, 352×288, 720×576, 1440×1152

Color format RGB24, I420

Interface USB2.0

Frame rate 30fps in 720×576

Signal-to-Noise >48dB

Lens F1.8/f7.85

Focalize spectrum 80mm to limitless

View angle ~50°

Camera control Saturation, contrast, sharp level, etc

White balance Auto, manual

Exposure Auto, manual

Working current < 200 mA

Illumination Auto

Microphone Built-in, <-60dB

Storage temperature -20°C to +60°C

Working temperature 0°C to +40°C

Weight 180g

3. System Requirement

- CPU speed: 1.8GHZ or higher
- RAM: 256 EMS memory or more
- Hard disk space 10GB
- Operating system: win2000, winXP
- USB2.0 port
- 64bit color display card

STK1160 DRIVER INSTALLATION

Pls find folder STK1160 Driver and open it, click “Setup” to install,

If your product is already connected with PC, pls disconnected, then click below “OK” entering operation page:

Click: “Install”

Click “Continue Anyway” and enter next step:

Click “Finish”, after below dialogue, click “OK”, then connect product to computer and go on installation.

Then below dialogue pls choose “NO, not this time” , and click “NEXT”;

Click “NEXT”:

Click “Continue Anyway” enter next step:

Click “Finish”, wait PC give auto notice “ new hardware installation finished” , then come to install control panel software.
